Student Teachers

Michael has been teaching a whole Middle Level language arts class on the History of Comics. They are now up to the characters of the Golden Age, from the 30s to the 50s.

Josef brought a cannon to History class this week. (Really!) He lectured about the weapons that were used in the Revolutionary War.

Andrew PS also took a turn teaching the History class recently, exploring the connection between the Founding Fathers and Freemasonry. Students have been taking turns teaching the Poetry and the Creative Writing classes.

What's Been Going On ?

In primary language arts, they've been enjoying non-fiction books. After reading about animal record holders, each student picked a favorite animal record holder to write about and draw.

How much trash and garbage do you create in a week? By the end of next week, middle level students will know. Starting Monday, they will begin to collect all of their trash and garbage. On Friday they are going on a tour of the landfill.

Heather's science students have been learning about density. They've been computing the density of things using a triple beam balance to find the weight and submerging the objects in water to find their mass. They've been experimenting with virtually anything that can get wet and can fit in a graduated cylinder. Heather says she is hoping students will bring their bathing suits to school so they can compute their own densities.

Marielena and Judy took students to Tohono Chul Park for an exhibiton about the Dia de los Muertes and a tour of the grounds. Nearly everyone, it seemed, went pumpkin picking in the weeks before Halloween, but Vanessa's homeroom cut right to the chase and went to Blue Willow for a custom-made pumpkin pie.

Jack says his writing class has been having fun with words. "They're really getting good at stream of consciousness writing. It takes practice, and now they are having fun with it."

Middle Level students on a letter boxing adventure.

What's growing in the garden?

Spinach, mustard, lettuce, peas, cilantro, shungiku, calendula, nasturtiums, bachelor buttons, chives, garlic, potatoes, sweet potatoes, strawberries, tomatoes, possibly peppers, and a variety of squashes.
